Style Sheet Classes

CSS Support

To use cascading style sheets in the WebPAC you must be familiar with CSS. Innovative does not provide assistance with editing style sheets, HTML code, or other standard practices of Web site maintenance.

- [Overview on Style Sheet Classes](#)
- [Customizing CSS Files](#)
- [Innovative Style Classes](#)
- [Examples](#)

Overview of Style Sheet Classes

Cascading style sheets define how various elements of a web page display in a browser. Style sheets are used to specify presentational elements such as page layout; font color, face, and size; and background color and images in WebPAC.

In web browsers, styles "cascade" into the next available style sheet according priority (listed in order of priority with the highest priority first):

1. Inline style (defined in an HTML element)
2. Internal style sheet (styles defined within the <head> tag of an HTML page).
3. External style sheet (a CSS file, such as the **ProStyles.css** and **styles.css** files).
4. Browser default

users ports

Web Opac unlimited users ports

This option contains WebPAC ports used to generate statistics for **UNLIMITED Web Opac login statistics**.

```
SYSTEM OPTIONS (OPAC options)
PORT NUMBER
1 > 80
2 > 4809
```

```
Key a number or
A > ADD a port                Q > QUIT
D > DELETE a port
Choose one (1-2,A,D,Q)
```

The options are:

ADD a port -- Add a port to the list. Enter the port number at the prompt.

DELETE a port -- Delete the specified port entry.

QUIT -- Quit.

1 Announcements

SCHEDULED MAINTENANCE ALERT: There will be scheduled maintenance to the Supportal on Wednesday, May 1 between 2 – 3pm PDT/ 9 – 10pm GMT. During this time we will experience a downtime lasting up to 5 minutes in duration. We apologize for the inconvenience.

If you need assistance during this maintenance window, please don't hesitate to reach out to us by phone - [click here for contact information](#).

April 23, 2019: We are pleased to announce the release of Sierra 4.3, Encore 4.9 and Resource Sharing 3.2. Please visit the Supportal article "[Release Announcements and Notes](#)" for links to Release Notes and fixes contained in these releases.

Libraries hosted with Innovative (as well as libraries running Sierra 2.0 SP1 or older) may submit a service request for our staff to perform the Sierra upgrade [here](#).
