

Both Interfaces - code shown for WebPac

No available copies on the search results screen

JavaScript

```
//Requires jQuery
//Placed in footer file
var briefCitSearch = "<!--this is customized <screens/briefcit.html>-->";
if (pageContainer.indexOf(briefCitSearch) > -1){
    $(document).ready(function(){
        linkCollector();
    });
}

//Standalone file
function linkCollector(){
    var links = [];
    $(".briefcitTitle a").each(function() {
        checkLinks(this);
    });
};
function checkLinks(data) {
    $.ajax({
        type: 'GET',
        url: data,
        dataType: "html",
        success: function(response) {
            var htmlStr = response;
            var checkAvaiStr = /\<td\>AVAILABLE\</td\>\n\</tr\>/;
            var checkSuStr = /\<td\>STATUS UNKNOWN\</td\>\n\</tr\>/;
            var regTesterAvai = checkAvaiStr.test(htmlStr);
            var regTesterSu = checkSuStr.test(htmlStr);
            if (!regTesterAvai && !regTesterSu) {

                $(data).parents().eq(2).children("#dateMatTypeRequest").children(".req").html(
                    "<div class='noAvaiCopy'><p>No copies currently available</p></div>");
            }
        },
        error: function(response) {
            console.log(response);
        }
    })
};
```
