

# Leap for Public Services

Jason Boland

Senior Library Training Consultant, Clarivate

# Leap for Public Services

- A general overview of Leap compared to the Polaris client
- New features with 7.4

# What is Leap?

Leap is browser-based Polaris access. It provides innovative new ways of accessing and managing the data in Polaris.

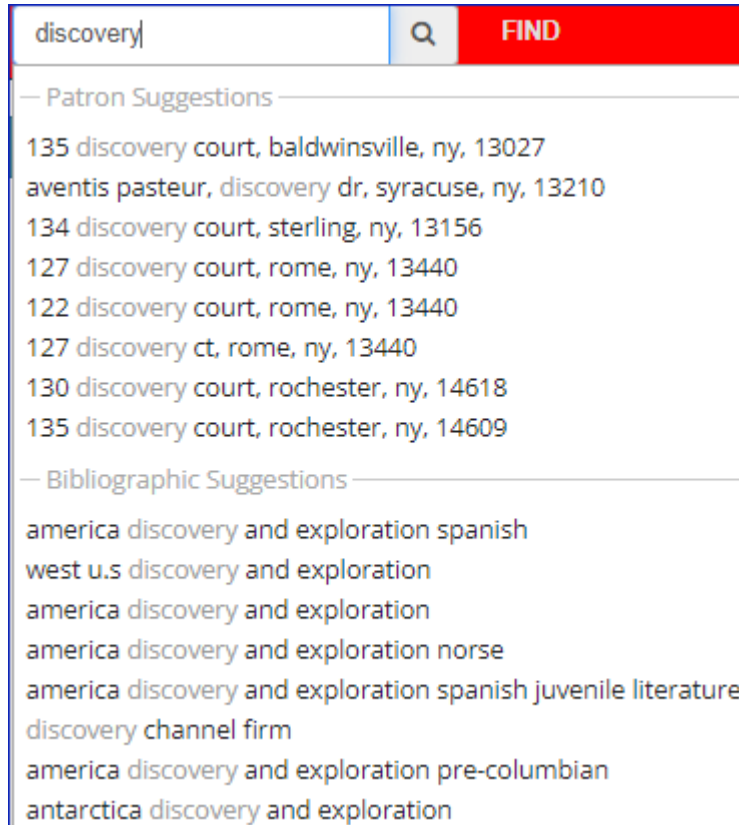

# Searching in Leap

Leap offers two search options: quick search for convenient record retrieval and the find tool for a more comprehensive search experience.

# Searching in Leap

Quick search does a keyword phrase search across several patron and bib data elements. This also provides predictive results as the terms are typed in.

The screenshot shows a search bar with the text 'discovery' and a magnifying glass icon. To the right of the search bar is a red button labeled 'FIND'. Below the search bar, there are two sections of predictive results:

- Patron Suggestions:**
  - 135 discovery court, baldwinsville, ny, 13027
  - aventis pasteur, discovery dr, syracuse, ny, 13210
  - 134 discovery court, sterling, ny, 13156
  - 127 discovery court, rome, ny, 13440
  - 122 discovery court, rome, ny, 13440
  - 127 discovery ct, rome, ny, 13440
  - 130 discovery court, rochester, ny, 14618
  - 135 discovery court, rochester, ny, 14609
- Bibliographic Suggestions:**
  - america discovery and exploration spanish
  - west u.s discovery and exploration
  - america discovery and exploration
  - america discovery and exploration norse
  - america discovery and exploration spanish juvenile literature
  - discovery channel firm
  - america discovery and exploration pre-columbian
  - antarctica discovery and exploration

# Searching in Leap

The find tool offers a unified search environment for all record types accessible in Leap. Multiple filters may be applied.

The screenshot displays the Leap search interface. At the top, a breadcrumb trail shows the search path: Patron > Basic Search > Name (Last, First Middle) > Keyword (All). Below this is a search bar containing the text 'Brown'. To the right of the search bar are icons for clearing the search, favoriting, saving, and searching, along with a menu icon.

Below the search bar, three dropdown menus are open, showing the search criteria and filters:

- Basic Search**: Options include Basic Search (selected), Power Search, and SQL Search.
- Name (Last, First Middle)**: Options include Legal Name (First Middle Last), Legal Name (Last, First Middle), Library-assigned block, Name (First Middle Last), Name (Last, First Middle) (selected), Newsletter, Notes, ORS Enabled, and Patron code.
- Keyword (All)**: Options include Exact, Exact (\*), Keyword (All) (selected), Keyword (Any), and Phrase.

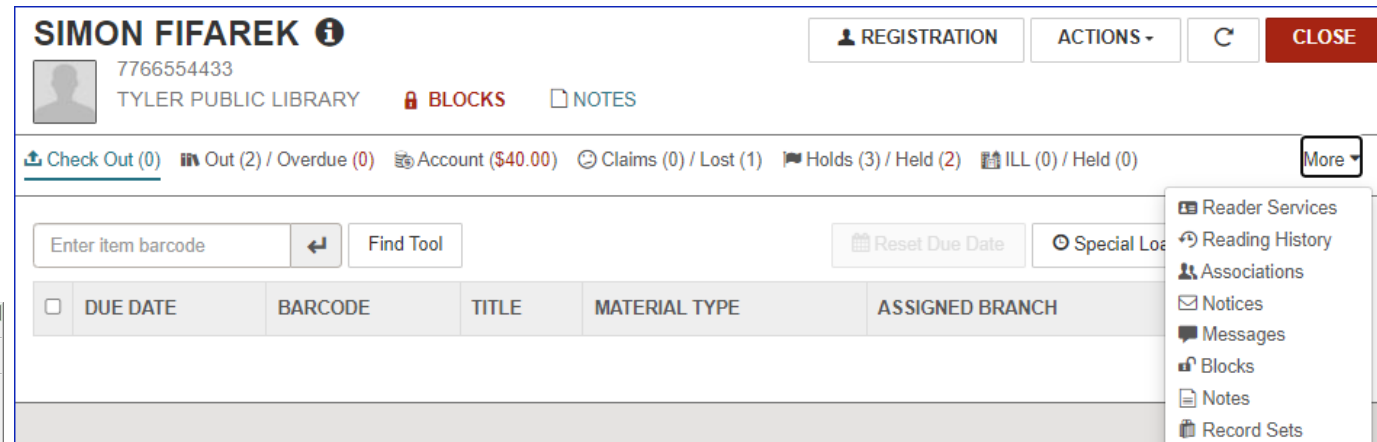

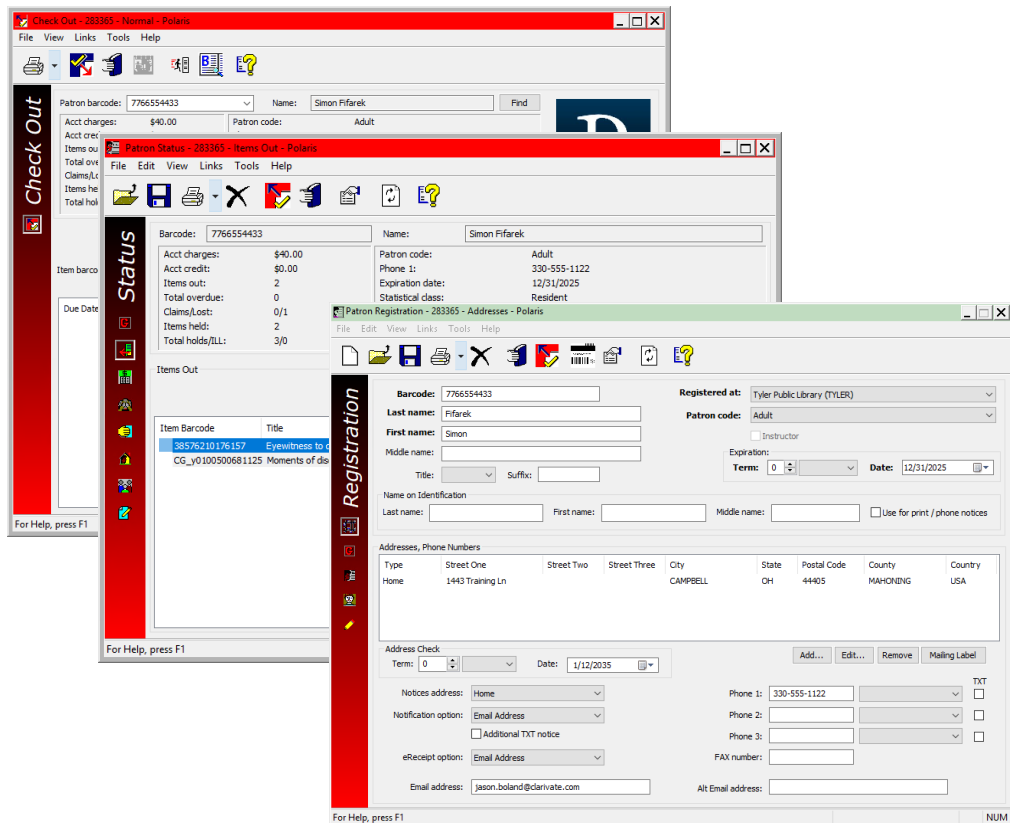

Below the dropdowns, a search filter is applied: 'Patron's registered library' is set to 'Jefferson Public Library (JEFF)'. Below this, two more filters are applied using 'AND' logic:

- AND**: Birth date is set to 'From: 1/1/2003' and 'To: 12/31/2008'.
- AND**: Internet Enabled is set to 'Yes'.

Each filter has a red minus sign and a green plus sign to toggle it on or off.

# Patron workform

The patron workform is also unified in Leap.

# Patron workform

The patron registration form appears as a single scrollable page.

# Record Sets and bulk functions

In Check In, a file of barcodes can be imported and checked in.

The screenshot displays the 'Check In' interface. At the top, there are buttons for 'CHECK IN', 'NEW PATRON', and 'PRINT'. Below this is a 'Check In' header with a 'CLOSE' button. A navigation bar shows filters: 'Normal (0)', 'Bulk (0)', 'In House (0)', 'Inventory (0)', 'Missing Part', and 'Shelf-Ready'. The main area contains a search bar with 'Enter item barcode', a 'FIND TOOL' button, and input fields for 'Free Days' (0) and a date (4/7/2023). Below the search bar is a table with columns: 'BARCODE', 'DUE DATE', 'STATUS', 'COMMENT', 'TITLE', 'PATRON NAME', and 'AS'. An 'ACTIONS' dropdown menu is open, listing: 'Clear List', 'Manage Item Record', 'Replace Barcode', 'Manage Missing Parts', 'Print List', and 'Load from File'.
