

Spotify “Wrapped” but for your library patrons!

Spotify Wrapped is a viral marketing campaign by Spotify. Released annually since 2016, every early December, the campaign allows Spotify users to view a compilation of data about their activity on the platform over the past year and invites them to share it on social media.

Why

-It's fun

-I had a 4 hour layover in Toronto during the Hackathon and got FOMO

Tech Stack

- Polaris Transactions DB is indexed into Elasticsearch (had this set up already)
- React front end
- Query ES to show the user fun statistics about their library usage for the year
- It's just data from a test card we have right now, so don't look into it too much

If there was more time

- It would be great to do more complex ES queries
- Could use the Polaris API to pull the patron's name and things (that I don't have in ES)
- Adding book covers would be nice
- Jazzy animated transitions between the various slides would be dope
