SILS

- Saskatchewan Information and Library Services
- Establish in 2009
- NPO funded by the 12 public library members of the consortia
- Maintain the ILS and provide other technical services
- We cover the entire geographic region of Saskatchewan
- Serving approximately 1.25M people
- Supporting over 300 branches and their staff

APIs

Appliance Power Interfaces

Application Programming Interface

- It's a type of contract between provider and consumer
- It's an abstraction that ideally hides complexity
- Designed for computer programs to access data or processes

New Databases

ConsumerReports.org provides ratings and reviews, recommendations and buying advice across several franchises. Each product includes an overview and a ratings report card, as well as tester reviews & recommendations. Additional information includes brand reliability and user reviews, plus news, blogs, forums and video content. You can also access this database from outside the library using your library card:

Out of Library

Ancestry Library Edition is an enhanced library version of Ancestry.com, a popular genealogy research tool that provides digital access to U.S., U.K and Canadian census returns, vital records and more.

#IUG2025

IUG 2025

Websites - Problem

- Outdated and not mobile friendly
- They drove traffic away to the OPAC (Online Public Access Catalogue)
- The OPAC had limited branding and messaging capabilities
- This prevented clear online communication between the member libraries and their patrons
- The OPAC had limited options on how information is displayed

Websites - Solution

- Take a content management system (CMS)
- Use the APIs provided by the ILS develop modules for search and account
- Combine those together and create websites for each library member
- Information could be presented and tailored through these modules

"Principles of Web API Design brings together principles and processes to help you succeed across the entire API design lifecycle. Drawing on extensive in-the-trenches experience, leading consultant James Higginbotham helps you align every stakeholder on specific outcomes, design APIs that deliver value, and scale the design process from small teams to the entire organization. Higginbotham helps you bring an "outside-in" perspective to API design to reflect the voices of customers and product teams, map requirements to specific and well-organized APIs, and choose the right API style for writing them. He walks through a real-world example from the ground up, offering guidance for anyone designing new APIs or extending existing APIs"-- Provided by publisher.

ISBN:

9780137355631

Description:

xxxiii, 333 pages : illustrations ; 24 cm

Notes:

"A Vaughan Vernon Signature Book"--Cover
Includes bibliographical references and index

Contents:

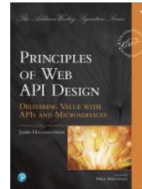

The principles of API design
Collaborative API design
Identify digital capabilities
Capture activities and steps
Identifying API boundaries
API modeling
REST-based API design
RPC and query-based API design
Async APIs for eventing and streaming
From API to microservices
Improving the developer experience
API testing strategies
Document the API design
Designing for change
Protecting APIs
Continuing the API design journey

Series:

Addison-Wesley signature series
Pearson Addison-Wesley signature series

Subjects:

Application program interfaces (Computer software)
Application program interfaces (Computer software) -- Design
Web services
Web site development
Web sites -- Design

A to Z World Food

Categories: Encyclopedias and Reference, Travel and Culture

The world's largest and most comprehensive database of food and food culture for 174 countries. This proprietary database includes 884 food culture articles, 6,500 traditional recipes, 650 ingredient articles, historical timelines, glossaries, and 2,000 food quotes. Lavishly illustrated with 14,000 photos.

A to Z World Travel

Categories: Encyclopedias and Reference, Travel and Culture

Contains 202 world city travel guides. These beautifully illustrated and up-to-date guides cover travel essentials, attractions, insiders' information, excursions, nightlife, shopping, culture, cuisine, health, security, language, maps, and lots more.

Academic OneFile Select

Categories: Education

Scholarly journals, magazines and newspapers - with full text and images.

Gale Health and Wellness

Categories: Health & Wellness

Magazines, reference books, and newspapers with health related information. Very accessible layman's terms.

Gale In Context: Elementary

Categories: Kids

Looking for an at-home educational resource for kids? Gale In Context: Elementary (formerly Kids InfoBits) can help! Support your child's learning with free age-appropriate, trustworthy, curriculum-related content covering topics like geography, literature, technology, and more!

Gale in Context: Middle School

Categories: Education, Encyclopedias and Reference, Kids

Gale Literature Resource Center

Categories: Arts

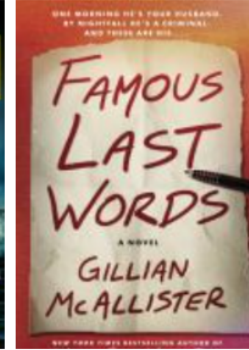

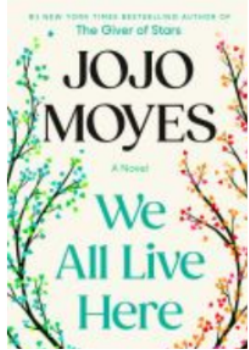

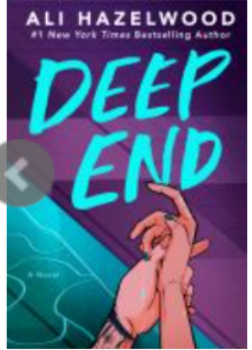

Covers biographies, bibliographies and critical

#IUG2025

IUG 2025

Websites - The Downsides

- We now have 12 websites that need to be maintained
- We have hosting costs for those sites
- When the ILS API changes we may need to verify those changes and adjust our solution accordingly
- When the CMS changes may also need to verify and adjust.
- Some search and account features are lost or limited

Application Feature Set Workspace

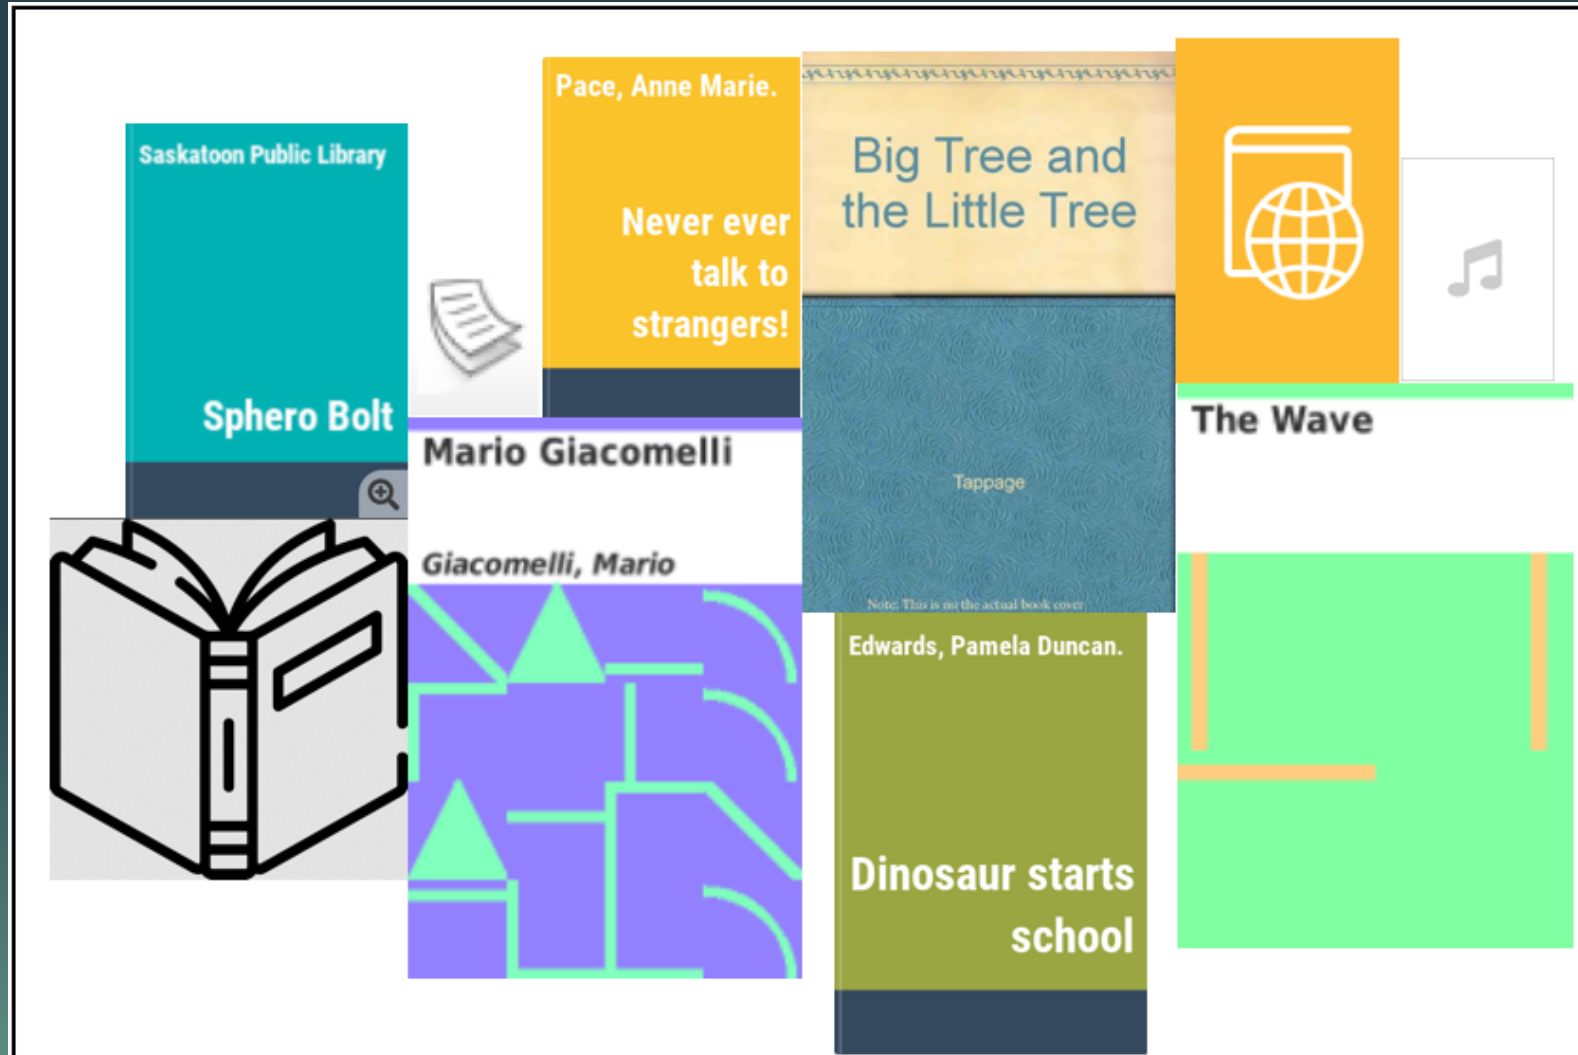

Websites - The Upsides

- We now have an all in one place for patrons to access services
- Tailored information
 - Reduce duplication of content
 - Cleaner titles less punctuation everywhere
 - Less is more
- Each site has its own analytics
- Creation of supporting modules
- Messages and notifications were now more visible to patrons
 - Funding cuts of 2017, protest, and reversal
 - Pandemic

Covers

Or lack thereof

Covers - Problem

We have a lot of missing covers, why?

- The identifiers on the bibliographic record simply don't match a cover in the provider's system
- Kits, toys, musical instruments, art, etc. simply don't have identifiers
- When we run out of options is there anything we can do?

Covers

Cover Service - Solution

1. Create a small application that will scan identifiers from a bibliographic record
2. Send them to the provider
3. If a cover is found
4. Return the URL for that cover

Wait a minute!

*Doesn't that mean you are scanning every
record and spamming the provider every
time a cover is needed?*

Cover Service - Solution

1. Create a small application that will scan identifiers from a bibliographic record
- 2. Check to see if that record has already been scanned if so, goto #6**
3. Send them to the provider
4. If a cover is found
- 5. Write it down in the database**
6. Return the URL for that cover

Wait a minute!
What happens when no record is found?
Are you scanning those every time?

Cover Service - Solution

1. Create a small application that will scan identifiers from a bibliographic record
2. Check to see if that record has already been scanned if so, goto #7
3. Send them to the provider
4. If a cover is found, goto #6
- 5. If no cover is found create a placeholder URL**
6. Write the URL down in the database
7. Return the URL for that cover

Wait a minute!
*What happens if a cover gets added to the
provider later?*

Cover Service - Solution

1. Create a small application that will scan identifiers from a bibliographic record
2. Check to see if that record has already been scanned **and not expired** if so, goto **#7**
3. Send them to the provider
4. If a cover is found goto **#6**
5. If no cover is found create a placeholder URL
6. Write the URL down in the database **with an expiration date**
7. Return the URL for that cover

The No Identifier Problem

Cover Service - Solution - No Identifier Problem

- We are already using bibliographic record ids
- Our application is a web application
- We can host these images ourselves
- Librarians can give us images for these record
- Overwrite the URL in the database
- But what about the expiration and scanning problem?
 - We can add an 'is permanent' value to the database

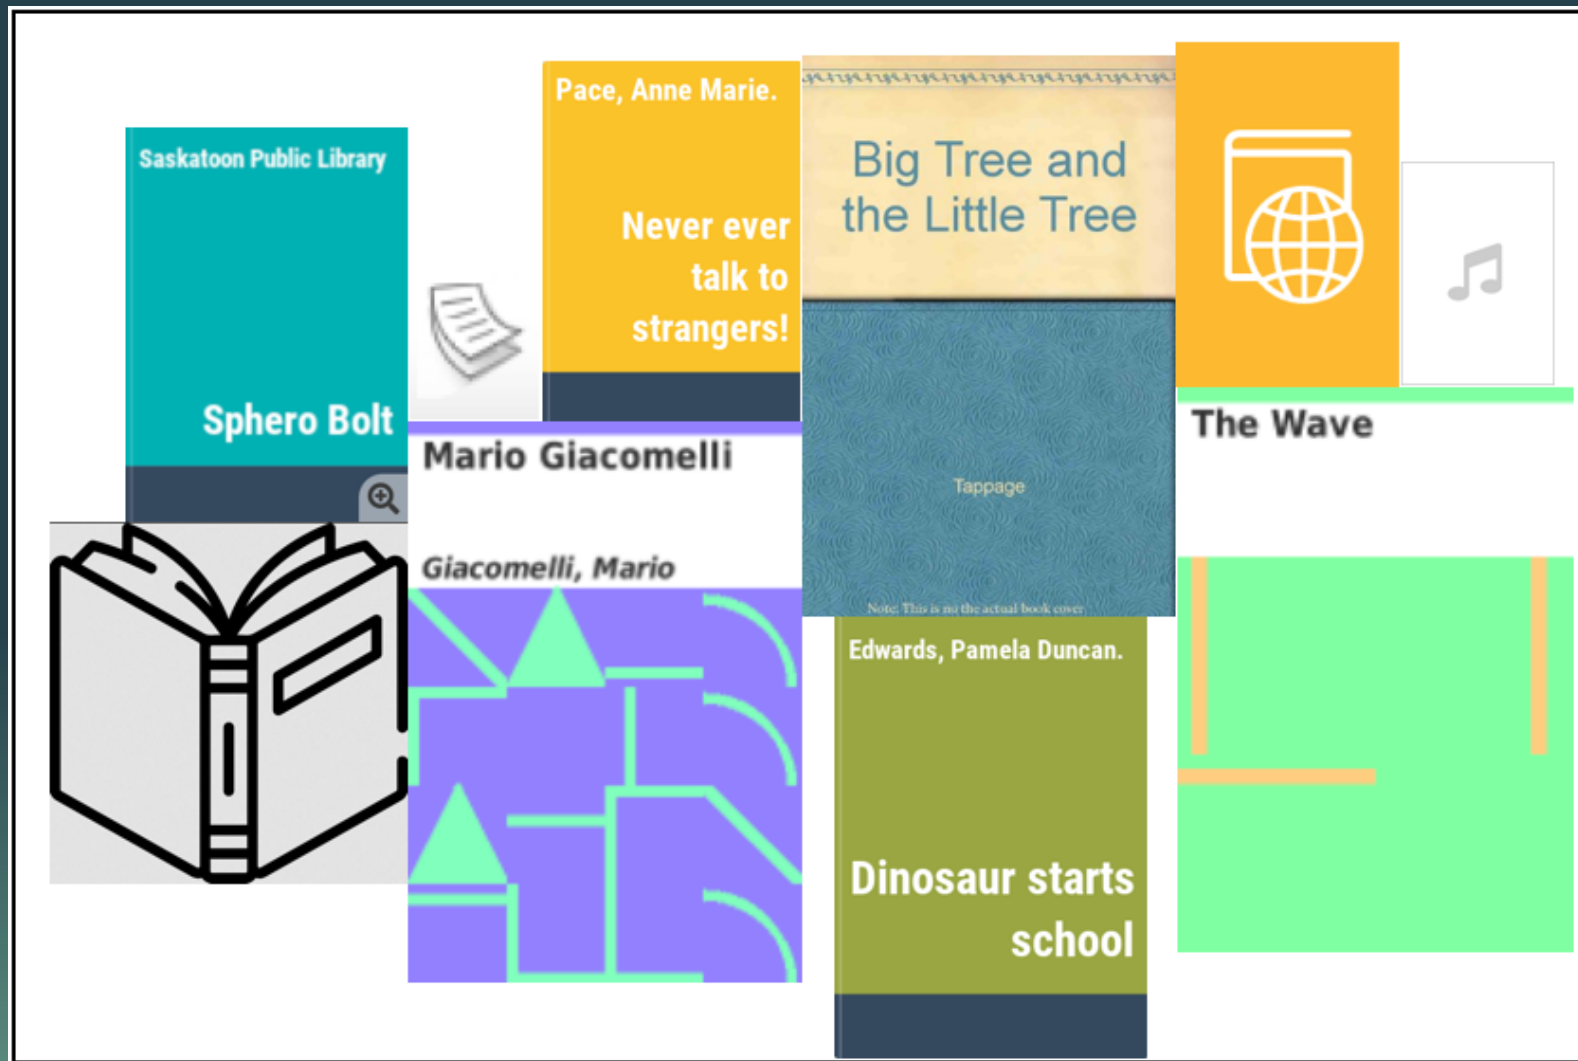

The EMagazine Problem

Cover Service - Solution - The Emagazine Problem

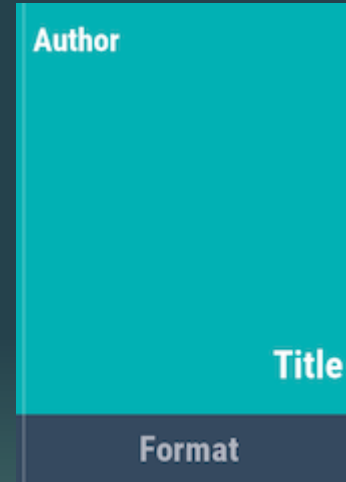

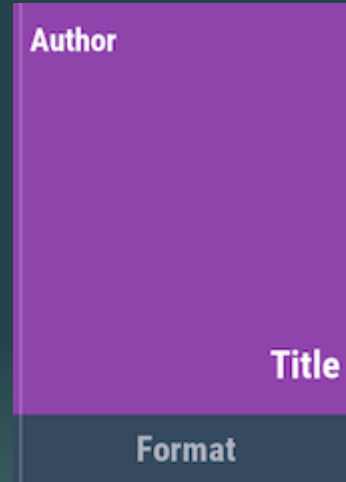

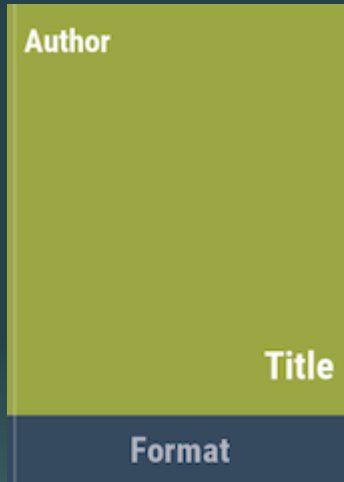

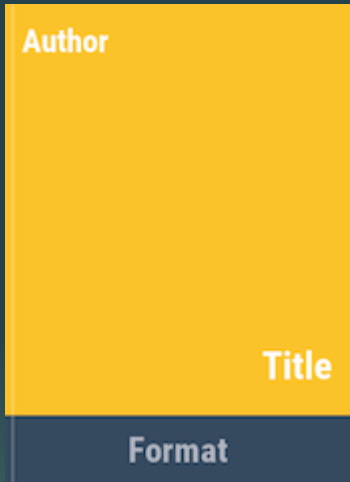

- Scan the bibliographic record for Overdrive links
- Ask the Overdrive API for the location of the cover
- Journal that URL down in the database
- Set an appropriate expiration date

The Last Resort

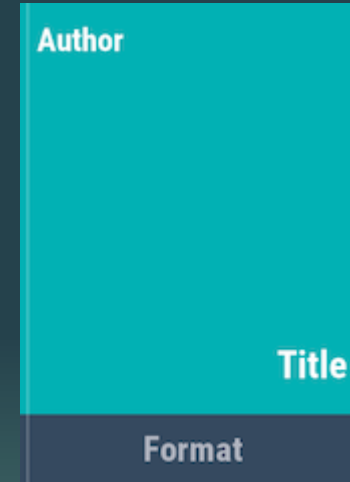

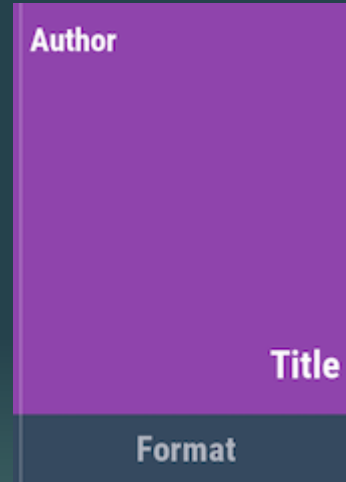

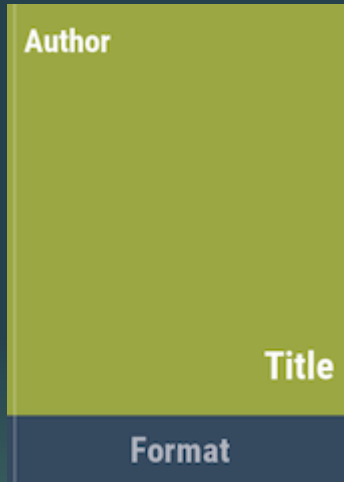

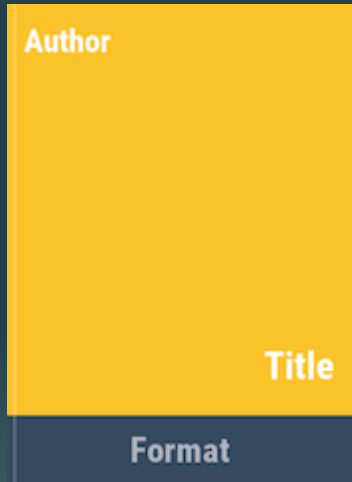

The Last Resort

All hope is not lost!

The Last Resort

All hope is not lost!

THE SHRUG

╰_(ツ)_╯

Cover Service - Solution - The Last Resort

- When all else has failed create the best possible alternative
- Scan the bibliographic record for title, author, and format
- Construct the url according to the provider's API
- Put it in the database with an appropriate expiration date

Cover Service - The Downsides

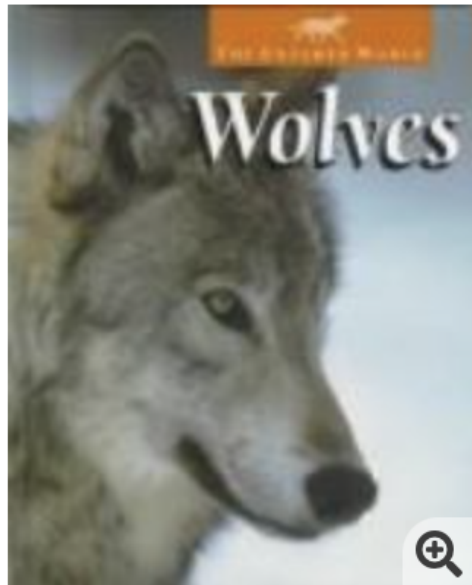

- Another service to maintain
- Hosting costs
- Single point of failure
- Custom covers can difficult to collect and load
- API Changes

Cover Service - The Upsides

- More covers
- Custom covers
- Multiple cover sources
- Flexibility

Cover Service - The Upsides

- More covers
- Custom covers
- Multiple cover sources
- Flexibility
- **We can quickly mitigate cover mismatches**

Whooping cranes

—Dudley, Karen, author.

Book

Published 1997

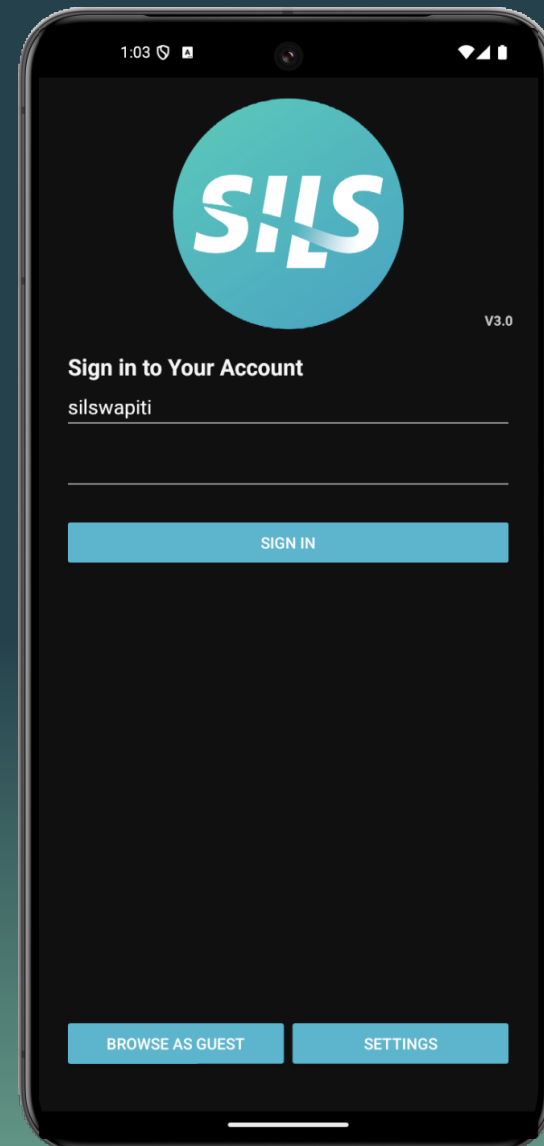

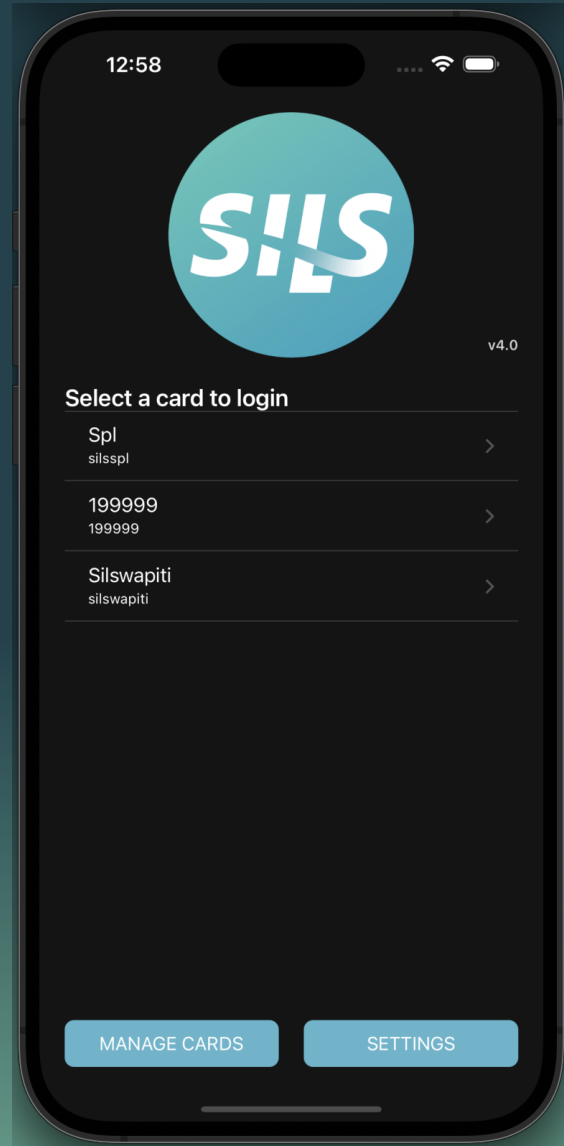

Availability: 17 of 17

Mobile Experience

Problem

*How do we reach patrons in the era of
mobile phones?*

Mobile Apps

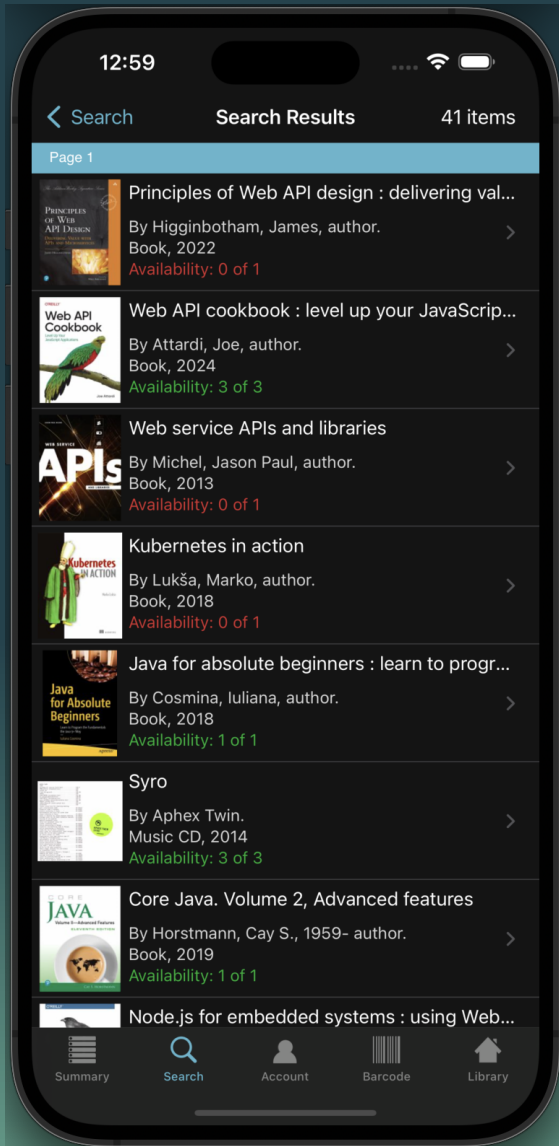

Mobile Apps - Problem

- How do we keep this project manageable?
- How do get the needed data safely over to the apps?
- Patrons were looking for alternatives to physical library cards

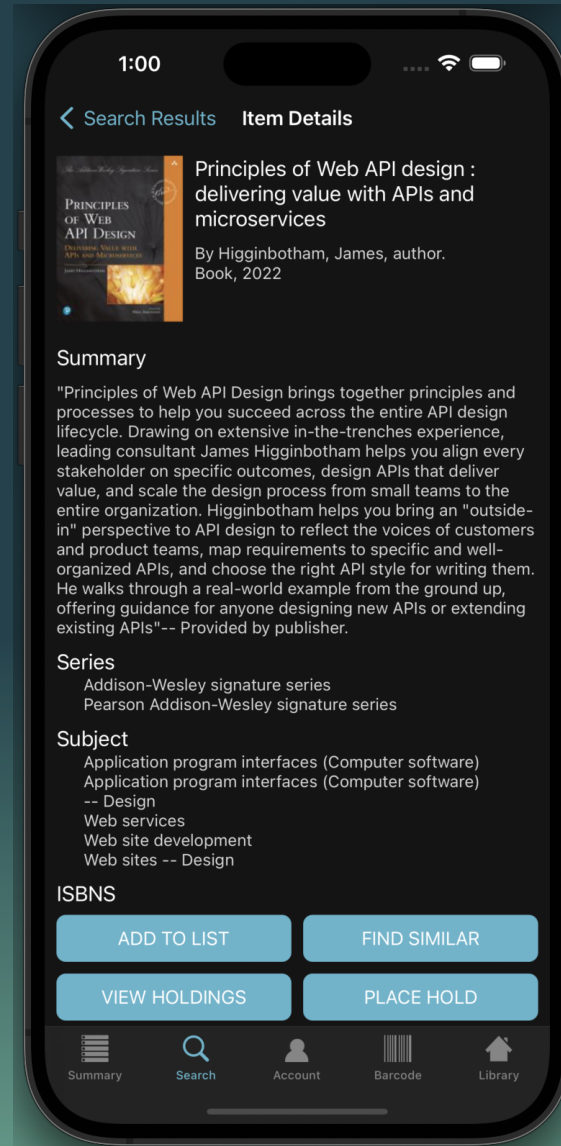

Mobile Apps - Solution

- Develop native apps (iOS, Android)
- Keep the feature set as small as possible
- Create a new API that can combine information needed for the apps in a secure way
- Create a digital library card in the app

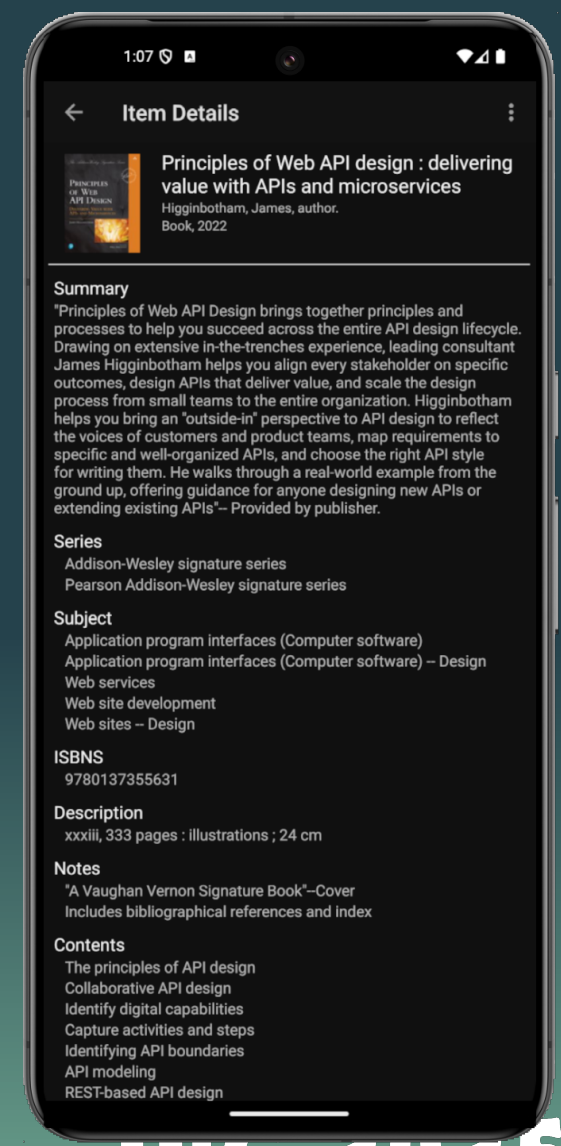

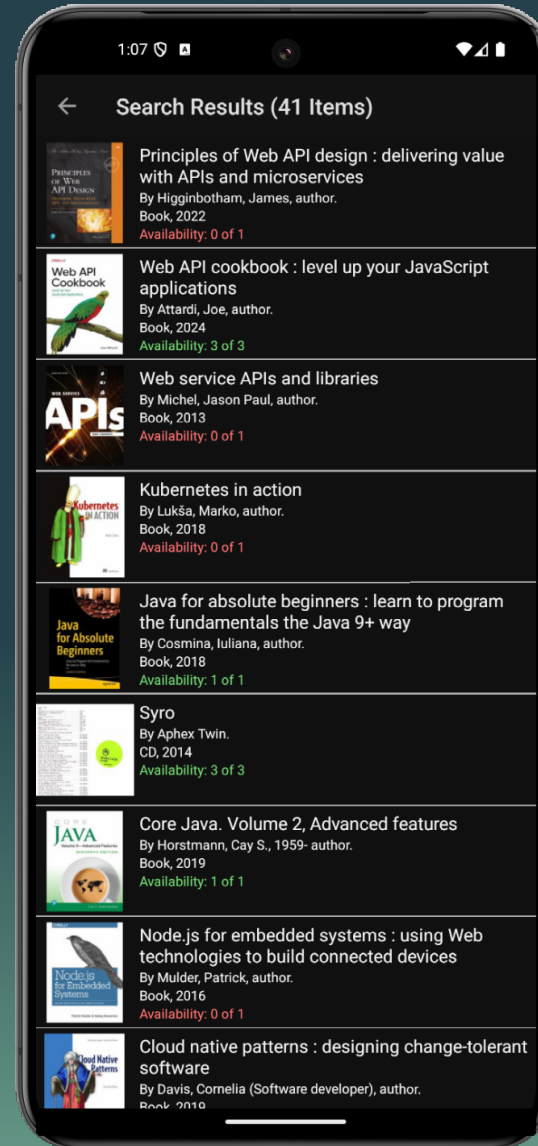

iOS

#IUG2025

Android

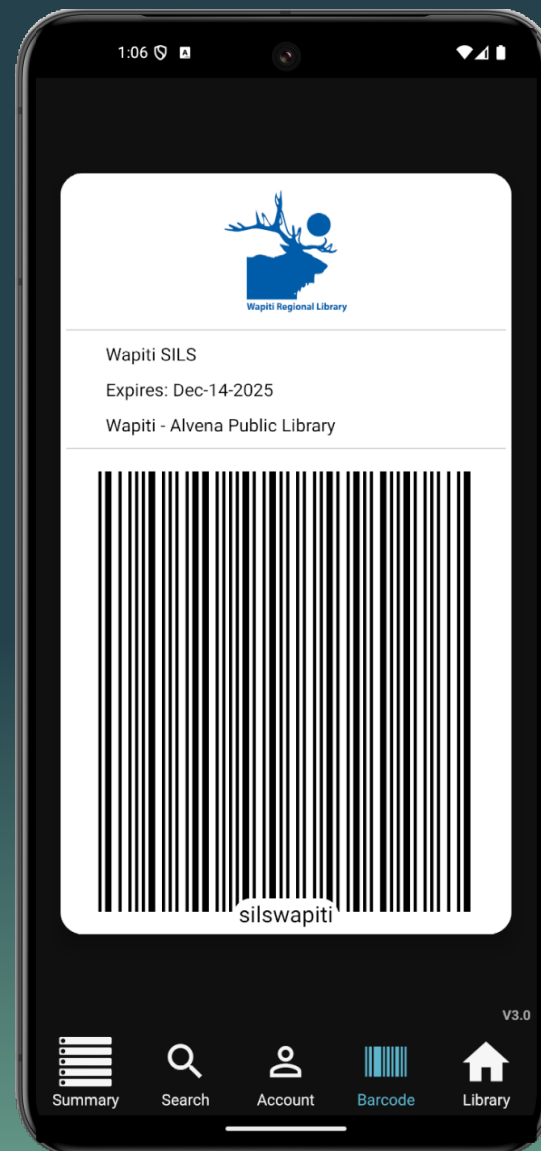

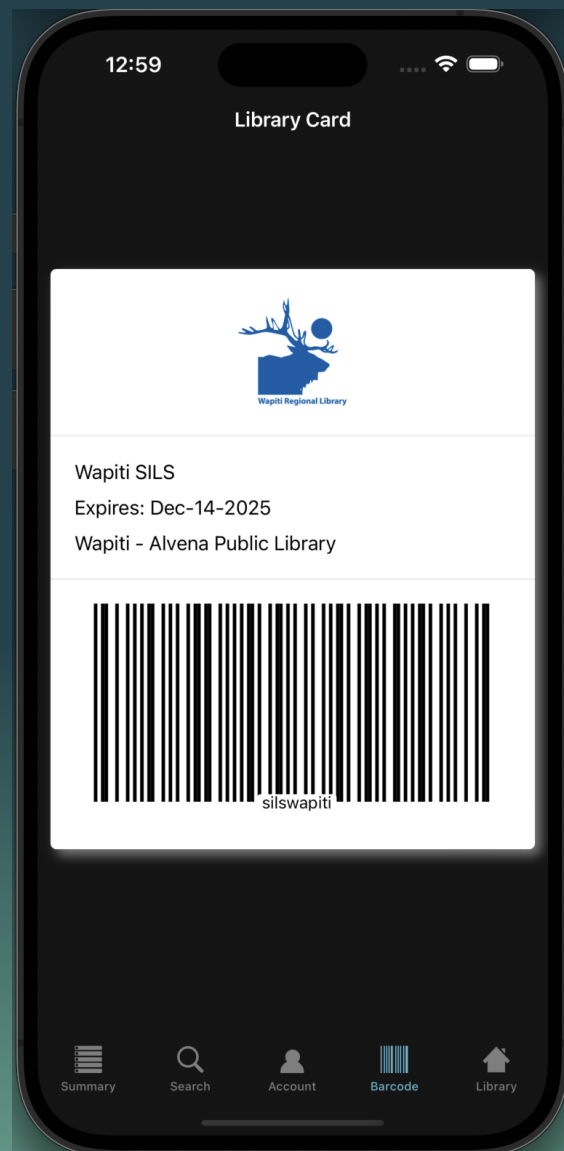

IUG 2025

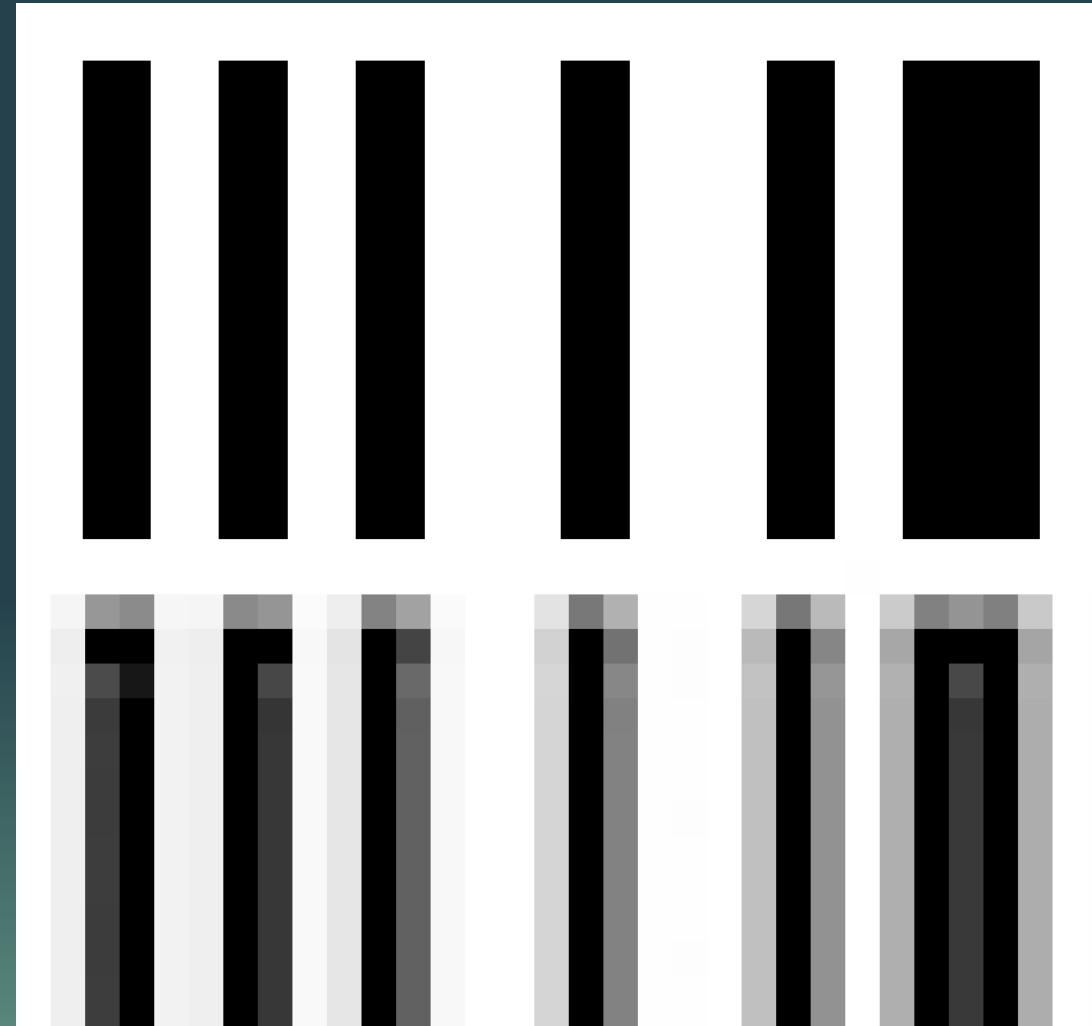

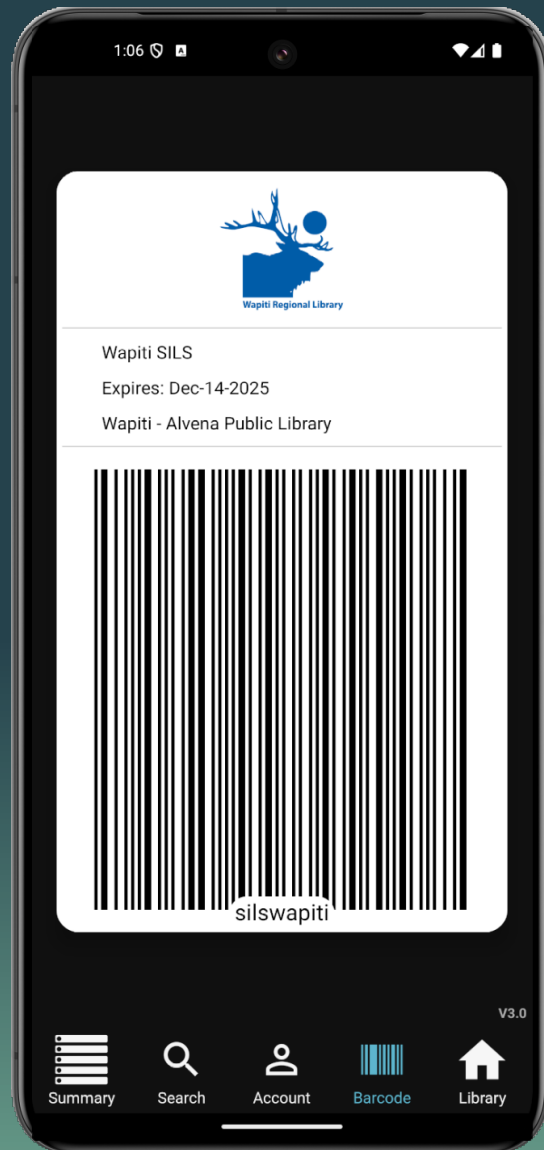

Mobile Apps - Solution - SILS API

- Hides the provider APIs
- Safely stores any API access keys
- API hides endpoints that we don't want accessed
- Combined information for less data requests

Library Card

Barcodes

#IUG2025

IUG 2025

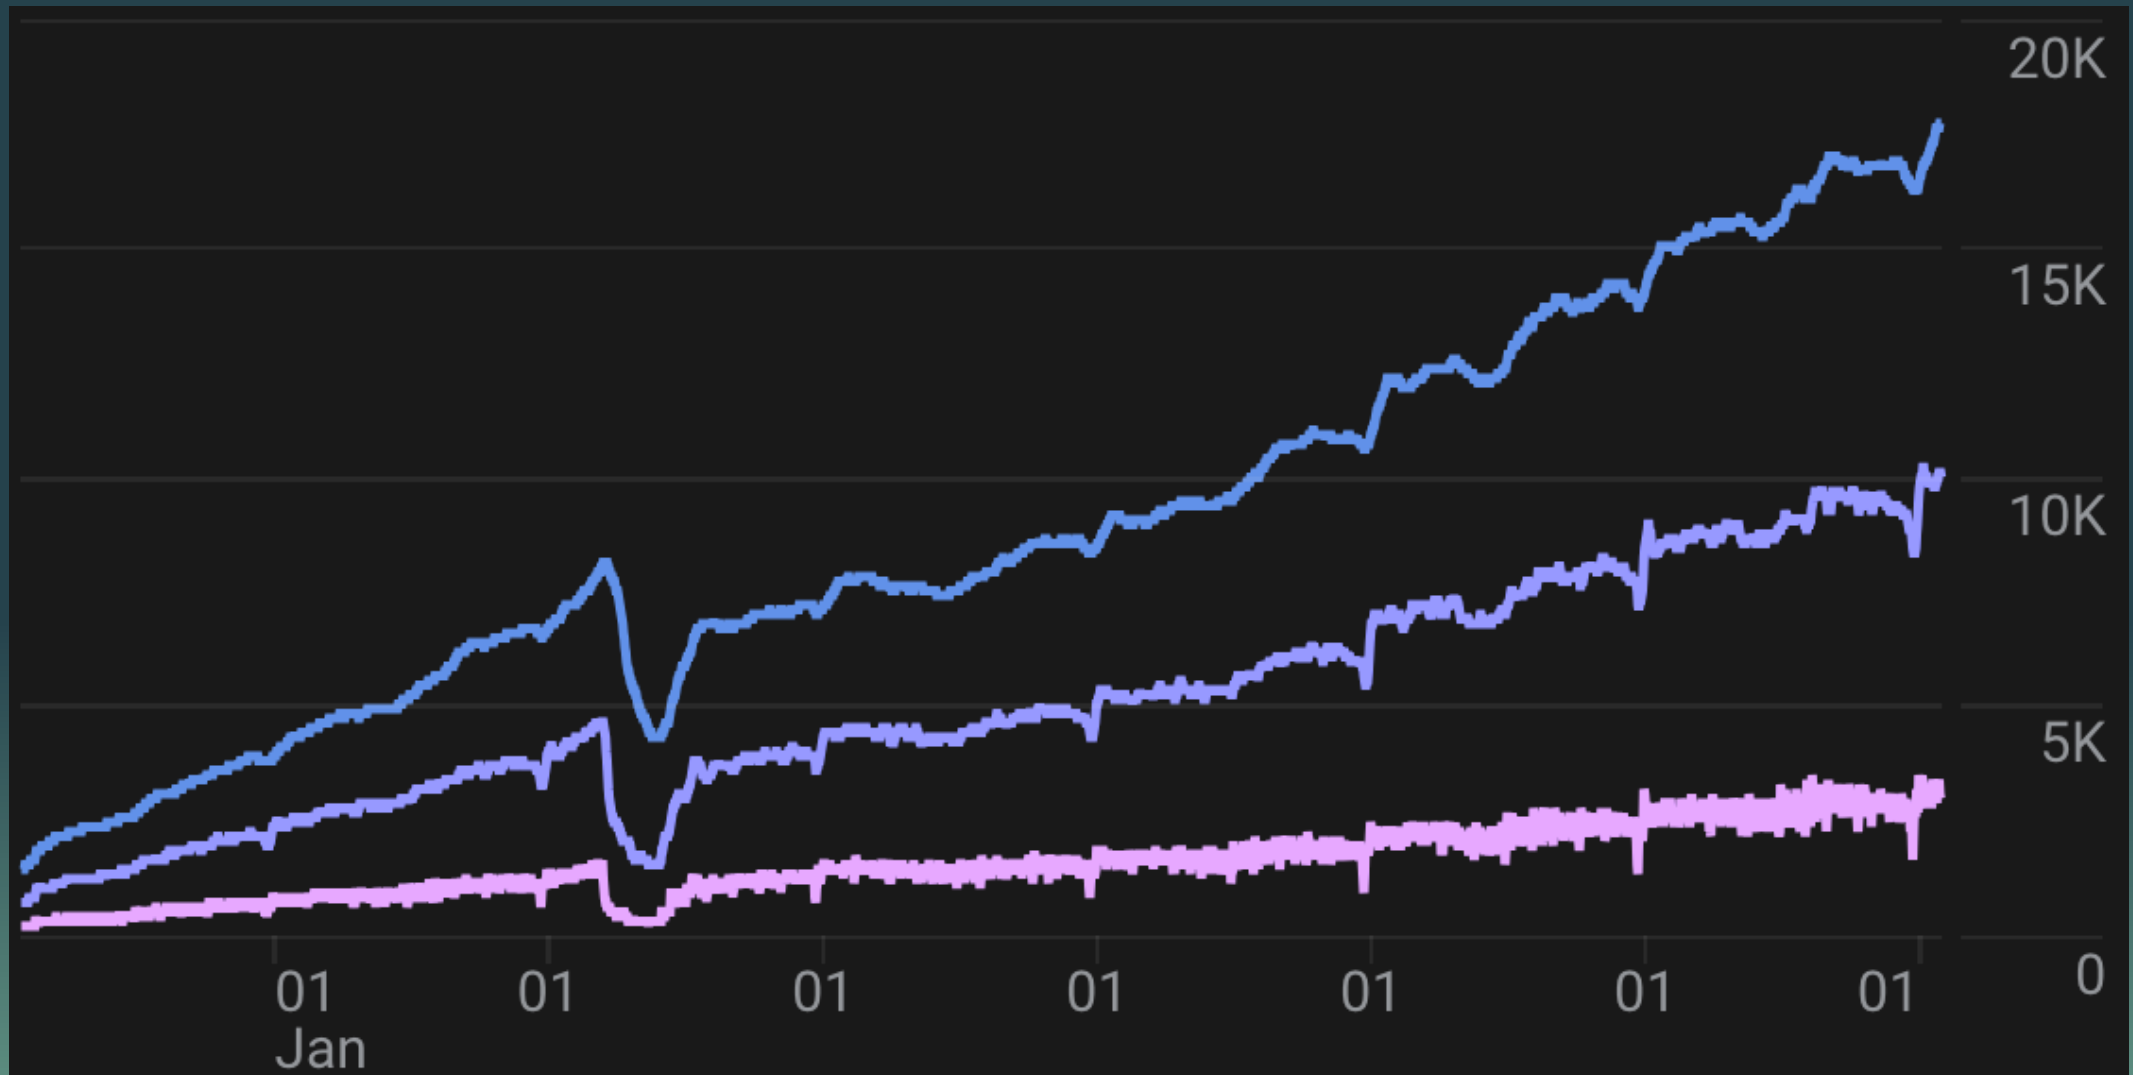

Mobile Apps - The Downsides

- Two apps, twice the maintenance
- Keeping the apps inline can be a challenge
- This is a changing space making maintenance more demanding
- Lots of documentation and bureaucratic hurdles
- App update adoption occurs gradually, changes need to be mindful
- Apps can only be changed with a release and cannot be changed quickly

Cover Service - The Upsides

- One app for everyone
- Digital library card
- Fast access
- SILS API

Joy!

Lessons Learned

Lessons Learned

- Maintenance
- Succession
- Internal vs external development
- Exploration leads to inspiration which leads to innovation
- Understand your users
- Simplicity over complexity

Dare to dream!

THANK YOU
