

# Both Interfaces - code shown for WebPac

---

## Goodreads

### HTML

```
<!--Add to bib_display.html wherever you'd like the GR link-->
<div id="gr" style="display:none;">
<p class="grHeader">Add to Goodreads bookshelf</p>
<div id="gr_add_to_books"></div>
</div>
```

### JavaScript

```
//Requires jQuery
//Add to bib_display.html
function grDataCheck (){
  var grApiResponse = this;
  if (grApiResponse != "No books match those ISBNs."){
    var grLink =
'https://www.goodreads.com/book/add_to_books_widget_frame/'+isbnNum+'?
atmb_widget%5Bbutton%5D=atmb_widget_1.png&amp;atmb_widget%5Bhide_friends%5D=on'
;
    var grScript = "<script src=" + grLink + "\>\</script\>";
    function addToShelf () {
      $("#gr").append(grScript);
      $("#gr").css("display", "block");
    };
    $(document).ready(function(){
      addToShelf();
    });
  } else {
  }
}
var isbnHeader = $('.bibInfoLabel:contains("ISBN")').next().addClass("isbn");
var isbnNum = isbnHeader.text().replace(/\\D/g, '');
if (isbnNum != "") {
  grApiCall(isbnNum, grDataCheck);
} else {
}
function grApiCall (isbn, callback) {
$.ajax({
  type: 'GET',
  dataType: 'text',
  timeout: 1000,
  url: "[YOUR FILE THAT CALLS THE GOODREADS API]" + isbn,
```

```
    success: function(data) {
        callback.call(data);
    },
    error: function(data) {
        callback.call(data);
    }
});
}
```

## PHP

```
//Standalone file
<?php
$http_origin = $_SERVER['HTTP_ORIGIN'];
if ($http_origin == "[YOUR CATALOG URL]")
{
    header ("Access-Control-Allow-Origin: $http_origin");
}

//gr info
$grUrl='https://www.goodreads.com/book/review_counts.json?isbn=';
$grAccessKey='[YOUR API KEY]';

//incoming data
$isbn = $_GET['data'];

//send request
$service_url=$grUrl.$isbn."&key=".$grAccessKey;
$curl = curl_init();
curl_setopt_array($curl, array(
    CURLOPT_RETURNTRANSFER => 1,
    CURLOPT_URL => $service_url
));
$resp = curl_exec($curl);

curl_close($curl);
echo $resp;

?>
```
